## PIPE FLASHING

## Standard Specifications

- Manufactured from EPDM or silicone rubber, Pipe Flashing is compounded for maximum resistance to ozone, UV light, \& temperature extremes.
- Flexible aluminum base will allow the flashing to conform to any metal roof configuration. Pipe location can be centered in the flat of the panel or the rib. Urethane sealant \& selfdrilling screws complete the installation.
- Well-marked so they can easily be cut with shears to fit exactly the pipe size used.
- Available in Black or Gray EPDM as well as Red or Gray high temperature Silicone.

## Description

Designed with sleeve flexibility to absorb vibration and pipe movement caused by expansion/ contraction while sealing out unwanted elements. Easy on-site customization can accommodate virtually all installations.

EASY INSTALLATION

1.Choose pipe opening and trim

3. Form to roof profile

4. Apply sealant

5. Fasten to complete
