- Available in a variety of colors
- Custom cut to the inch up to 40'
- Cut panels coated with CECI®
- Heat-formed panels with 1/2" major rib height

Everdrain® - Roof: Slate

Description

Attractive Look

The symmetrical pattern of Everdrain® creates an attractive board and batten look, which is a popular choice for a variety of building applications. The crisp, clean appearance, along with the variety of color options available make it the perfect roofing and siding material for agricultural, industrial, and commercial buildings. A full line of trims and accessories are available to complete your building project.

Superior Strength

The panels, which interlock to create the attractive look, also provide for the weather-tight seal. They have a deep drain channel, which protects against leakage. The wide overlap increases strength and protection at each joint. Everdrain® is 38" wide and provides 36" of coverage. The major ribs are 6" apart and approximately 1/2" high with two minor ribs in between.
